

Information System Development

Industrial & Management Engineering

Spring Semester - 2026

Team Project

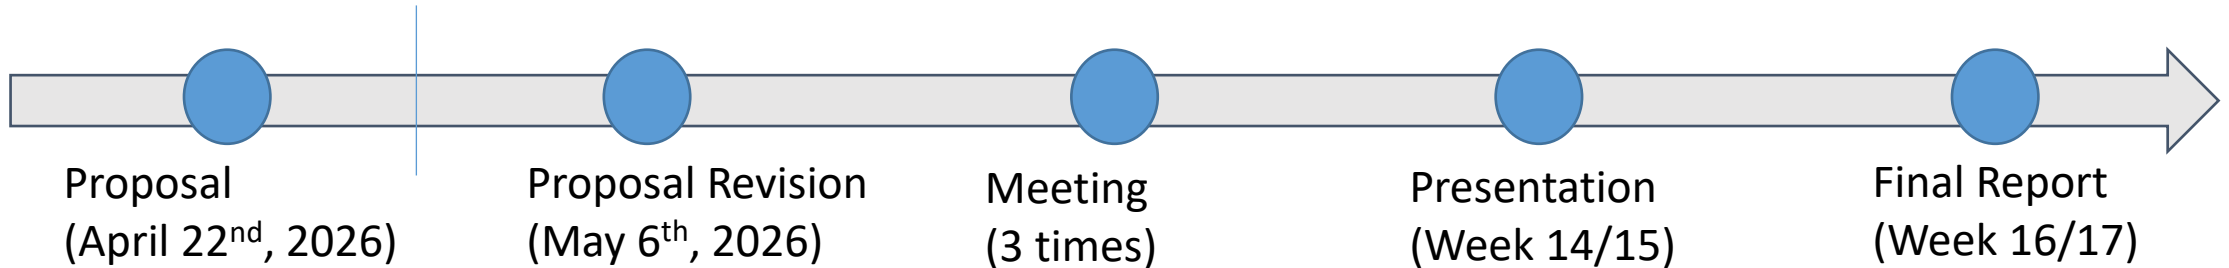

Information System Development
Industrial & Management Engineering
Spring Semester - 2026

Proposal for Team Project

- Due: April 22nd, 2026
- Each team should write a proposal with following contents:
 - Real Problem Definition
 - Project Objective
 - Project Scope
 - Similar work of the project
 - The role of each team member
- Note: The program should use FastAPI
- Submit to e-class before the due time

Timeline and Assessment for Team Project

Decision (Approve / Revision)
(April 29th, 2026)

Assessment	5%	40%	50% + 5% (Peer assessment)	100%
------------	----	-----	-------------------------------	------

Team Project Assessment (30%)

Report(20%)

Evaluation Criteria (Presentation & Final Report)

- Complexity (30%)
 - The program includes all sections that students learnt in one semester.
 - The program is closed to the real-world problem.
- Completeness (20%)
 - The analysis result has no error
- Credibility (20%)
 - Students can prove their own ability to make the program (without any helps from others)
- Creativity (20%)
 - Students can show unique contribution of the program
- Individual Score (10%)
 - If you contribute to the team, all four (4) C will be applied to you. In addition, the individual score depends on your role in the team.

Scoring method

Complexity	Very Complex. There are new things on the algorithm.				Less Complex. The algorithm are available in the internet
Score	100				60

Completeness	No Error				Some error exist and crucial
Score	100				60

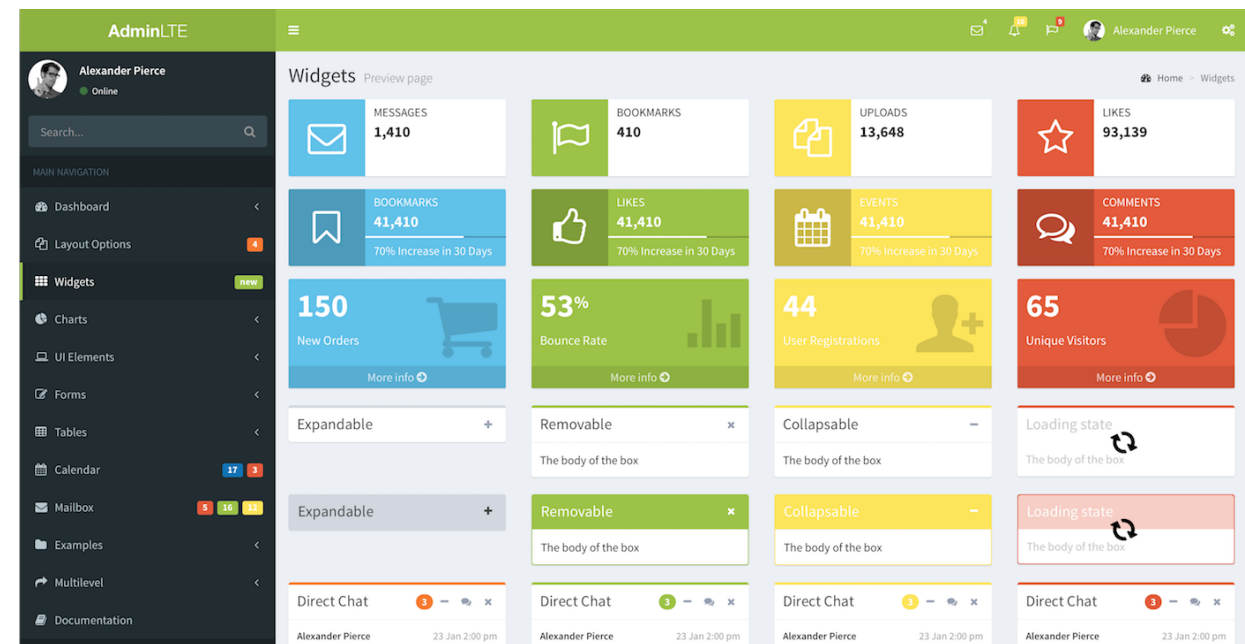

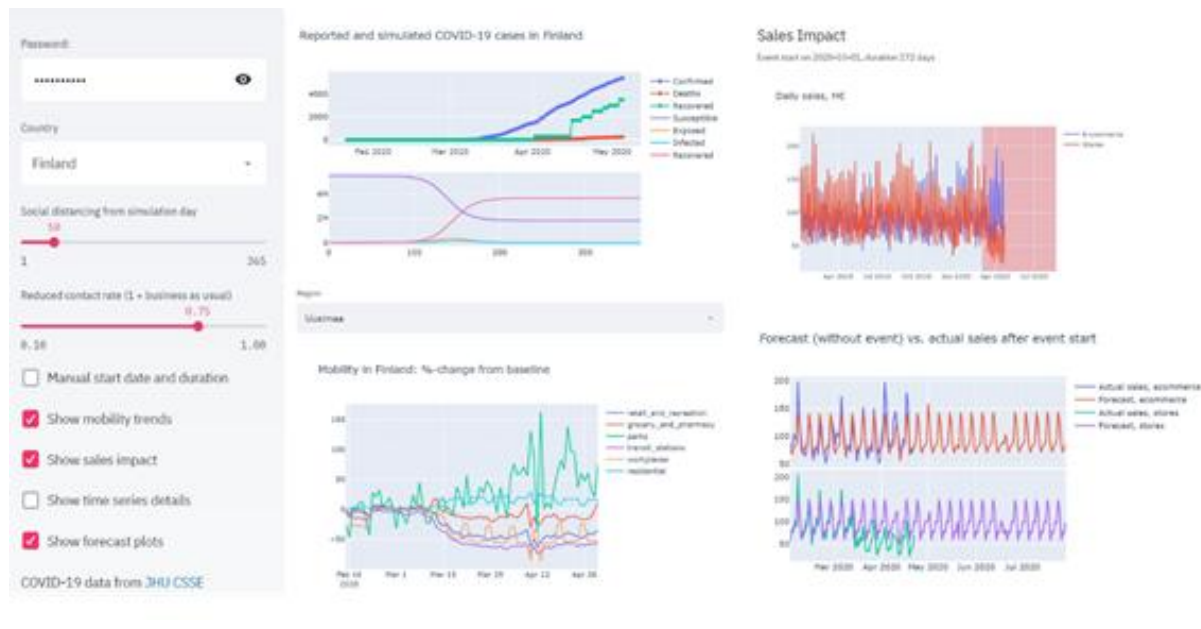

Credibility	Clear Explanation				Unclear Explanation
Score	100				60

Creativity	Very Unique				No Uniqueness
Score	100				60

Individual Score	High Contribution				No Contribution
Score	100				0

Possible topics for team project

- Machine Learning Website
- Dashboarding
- Etc.

Final Report

- Paper-based format (논문)
- Template will be given after mid-exam
